INDEX TO VOLUMES 1, 2, AND 3

ARTICLES (by title)

A case study: Developing convergent formative methodology, Thomas M. Schwen and John M. Keller, 1:1, 31-35

A comparative analysis of models of instructional design, Dee H. Andrews and Ludwika A. Goodson, 3:4, 2-160

A formative evaluation of formative evaluation: The state-of-the-art concept, Roger Kaufman, 3:3, 2-3

A framework for investigating consultation in instructional development, David P. Rutt, 3:2, 9-16

A model for applying cost-effectiveness analysis to decisions involving the use of instructional technology, Richard Lent, 3:1, 26-33

A third dimension: The future of educational technology in industry, Frank D. Patton, 3:3, 25-27

An alternative for task analysis in the affective domain, Wellesley R. Foshay, 1:2, 22-24

An analysis of research needs in instructional development, Joseph J. Durzo, Robert M. Diamond, and Philip L. Doughty, 2:4, 4-11

Applying the ATI concept in an operational environment, Perrin E. Parkhurst and Barbara L. McCombs, 3:1, 33-39

B

Basic considerations for implementing instructional development programs in higher education: Some suggestions from the literature, Joseph J. Durzo, 1:2, 30-35

C

Can you really do instructional development on 2c a day?, Kent L. Gustafson, 1:1, 28-29

Caveat designare: A case study in the realities of copyright issues, William C. Coscarelli and Shari Rhode, 2:2, 2-8

Content analysis via concept elaboration theory, M. David Merrill, 1:1, 10-13

Contracting for instructional development, David F. Leitzman, Suella Walter, Rodney S. Earle, and Charles Myers, 3:2, 23-29

Cost-effective video: A taxonomic decision model for media selection, Martin Freedman and Jerold Gruebel, 2:3, 2-7

Cost-effectiveness analysis tradeoffs and pitfalls for planning and evaluating instructional programs, Philip L. Doughty, 2:4, 17, 23-25

Cost-effectiveness evaluation: A case study of an innovative program in higher education, Jerry Klein and Philip Doughty, 3:3, 19-24

D

Descriptors of evaluations in instructional development: Beyond the formative-summative distinction, Earl R. Misanchuk, 2:1, 15-19

Designing instruction for attitudinal outcomes, Michael R. Simonson, 2:3, 15-19

Designing, producing, and evaluating an instructional telecourse: A model involving the adult learner, Marietta Lynn Baba, Joy Shermer, and Norma Shifrin, 3:4, 23-31

Determining instructional costs through functional cost analysis, Albert Beilby, 3:2, 29-34

E

Evaluation technology in instructional development, Robert D. Tennyson, 2:1 19-26

F

Formative evaluation in instructional development, Walter Dick, 3:3, 3-6

Formative evaluation strategies for major instructional development projects, Dennis D. Gooler, 3:3, 7-16

G

Graduate education in instructional systems: A review of selected programs, Mark I. Patridge and Robert D. Tennyson, 2:2, 18-25

H

Hierarchical and information processing task analysis: A comparison, Paul F. Merrill, 1:2, 35-40

I

Improving readiness for change and innovation: A case study, Patrick J. Nalbone, 3:1, 2-8

In search of a better way to organize instruction: The elaboration theory, Charles M. Reigeluth, 2:3, 8-15

Individual differences and instructional design, Richard E. Snow, 1:1, 23-26

Instructional development: Fruit fly or lemming?, Ivor K. Davies, 1:2, 5-9

Instructional development in developing nations, Dennis D. Gooler, 2:2, 8-17

Instructional development project: Five-semester report on an innovative introduction to psychology course, Lawrence T. Guzy, Joseph S. Gardiner, and David A. Humphrey, 2:3, 20-30

Instructional development projects in higher education: Predicting success, Robin E. Lawrason and John G. Hedberg, 2:2, 32-38

Instructional systems development in the next decade, Richard C. Boutwell, 2:3, 31-35

Introduction to the symposium, Kenneth H. Silber, 1:1, 4-5

J

JID after two years: The editor's viewpoint, Kenneth H. Silber, 2:4, 2-3

L

Lecturing *is* a personalized system of instruction—for the lecturer, Kathleen M. Fisher, 3:1, 9-15

M

Motivation and instructional design: A theoretical perspective, John M. Keller, 2:4, 26-34

N

Needs assessments: Internal and external, Roger Kaufman, 1:1, 5-8

P

Prerequisites for understanding: Implications for the design of instructional strategies and materials, Buford E. Wilson, 1:2, 17-21

Promoting adherence to a new paradigm of instructional management, Robert A. Reiser, 2:1, 27-28

Prototype development of a self-instructional program in media selection, Elaine A. Weiss, 1:2, 25-29

Promoting adherence to a new paradigm of instructional management, Robert A. Reiser, 2:1, 27-28

Prototype development of a self-instructional program in media selection, Elaine A. Weiss, 1:2, 25-29

Putting together an instructional development team, Edward E. Green and Gordon E. Mills, 2:1, 29-33

R

Research, theory and instructional development: A view from the trenches, Robert M. Diamond, 1:2, 2-5
Rural education in Bolivia and the potential of educational technology, Larrie E. Gale, 1:1, 35-40

S

Scientific notation in instructional design, Richard C. Boutwell, 2:1, 9-14
Selecting instructional strategies or once you've got an objective, what do you do with it?, Gerald W. Faust, 1:1, 18-22
Survey results of ID activities in higher education, Harry Liebler, 2:2, 26-31

T

Teaching conceptual networks, Susan M. Markle, 1:1, 13-17
The dance of evaluation: Hustle or minuet, Eva L. Baker, 1:1, 26-28
The future of instructional development: Deliverance, Kenneth H. Silber, 2:1, 2-5
The future of instructional development—Through the looking glass darkly, Kent Gustafson, 2:1, 2-5
The instructional development specialist as consultant, Barry Bratton, 3:2, 2-8
The relationship of test performance to ISDP rating in organic chemistry texts, Soo-Young Choi, M. David Merrill, Ed Callahan, Richard T. Hawkins, and Robert F. Norton, 3:1, 16-25
Transmitting instructional development to university faculty: Two approaches, Dean N. Osterman, 2:4, 12-16
Types of capabilities and learning hierarchies in instructional design, Robert M. Gagne, 1:1, 8-10

U

Understanding psychological styles in instructional development consultation, William C. Coscarelli and Jerry K. Stonewater, 3:2, 16-18, 21-22
Using computer-based education to teach reading to nonliterate adults, Robert M. Caldwell, 3:4, 16-18, 23
Using formative evaluation for the selection of instructional materials, James O. Carey and Lou M. Carey, 3:3, 12-18
Using Gagne's events of instruction as a guide for producing stimulus material, Walter Wager, 2:1, 6-8

W

We live in two different worlds: A reaction to Patton's article, Clinton J. Wallington, 3:3, 28-29
What is the design science of instruction?, Charles M. Reigeluth, C. Victor Bunderson, and M. David Merrill, 1:2, 11-16

if you understand the importance of technology and are involved in education, then you should read

EDUCATIONAL TECHNOLOGY: A GLOSSARY OF TERMS

This up-to-date glossary, carefully and logically divided and cross-referenced, provides an invaluable aid to anyone involved in this exciting new field. You should consult this publication for an indispensible, exhaustive collection of accurate terminology.

A MUST for:
education editors
professors
libraries
schools of education
media directors

An excellent committee tool.

Non-member price $20.50
Member price $17.00

and...

THE DEFINITION OF EDUCATIONAL TECHNOLOGY

A Theory
A Field
A Profession

a welding of concepts, skills and procedures from a wide variety of disciplines into brand new applications crucial to the educational community.

Non-member price $9.50
Member price $7.95

Both of these valuable educational tools are available from:
